

Restoration Cleaning Systems

...cleaning and protecting Heritage Building....professionally and safely....!

Protecting Heritage Building: The quality of the RESTORATION, the ON-GOING HEALTH, and AESTHETIC APPEAL of a heritage building; starts with a professional and expert cleaning!

Permanent – Irreparable Damage is caused to Heritage Buildings - through inappropriate cleaning & maintenance techniques / products, unskilled people, lack of knowledge..... It is therefore critical that the potential risks associated with cleaning & maintaining building (particularly stone) are fully understood by the building owner, the architect, engineer, and contractors, working on the building.

VESS Restoration Cleaning Systems are proven effective and safe, and combined with the experience of an accredited VESS Cleaning Contractor to correctly diagnose and then match the correct cleaning technique for particular problems; the surface will be restored and maintained without any risk of further damage or unintended consequences.

What we do

- provide the means for cleaning stone, brick, marble, Oamaru stone, concrete and wood surfaces that is effective and safe: doesn't risk further damage to the building surface
- use proprietary systems developed from 30+ years experience in the safety cleaning and restoring heritage buildings and buildings requiring a sensitive, and/or innovative approach
- provide building owners' and restorer's access to this expertise and to best practice cleaning techniques critical for the restoration, ongoing health and aesthetics of heritage buildings
